

35. The star is formed. Now we need to lock the model.
36. Valley fold one flap, from the central cross to the tip. Unfold.
37. Bisect the angle just formed.
38. Pull out the hidden layer.
39. Mountain fold the flap into the pocket. Rotate 90 degrees.
40. Repeat steps 36–39 on the other three points.

The finished star.
